I am a **skilled web developer** with expertise in **Node.js** specializing in building scalable and secure web applications. With a strong passion for problem-solving and clean coding practices, I focus on developing efficient backend systems and seamless user experiences. Always eager to learn and adapt, I strive to create innovative solutions that enhance functionality and user engagement.

## SKILLS

- **Programming Languages**:

    - JavaScript, TypeScript

- **Frameworks:**

    - Express.js, Node.js, Next.js

- **Database:**

    - MongoDB, MySQL, PostgreSQL,

- **Version Control and CI/CD and Project Management Tools :**

    - Git/Github , Jenkins , Github Actions, Jira

## EDUCATION

**Bachelors in Computer Science and Information Technology (B. Sc.CSIT)**          **2023-Present**
*Tribhuvan University, Kathmandu*

**+2 in Science (Physics and Maths)**          **2019-2021**
*D.A.V, Lalitpur*

# **PROJECTS**

DAILY MOTIVATION APP

- A web-based application built with **Node.js, Express, MongoDB** to help users stay motivated by tracking their daily progress and goals. It features **user authentication with JWT**, habit tracking, mood analysis, and personalized motivational quotes. The app includes **secure API endpoints**, **real-time data storage with MongoDB**, and **reminder notifications** to enhance productivity and well-being.
